Super Lawyers

Brian S. Franciskato
Randy W. James

LITIGATION FOCUSED. RELATIONSHIP DRIVEN.

The attorneys at the Nash & Franciskato Law Firm have dedicated their careers to helping people who are seriously injured by others. Our practice is nationwide and includes cases involving automobile and trucking accidents, wrongful death, class actions, products liability, and defective drugs and medical devices.

Dean Nash, Brian Franciskato and Randy James bring over 75 years of combined legal experience helping clients. We have gained local and national recognition, and are routinely asked by other attorneys to act as lead counsel or co-counsel in complex cases against some of the world's largest corporations. We have the technology and resources of much larger firms, enabling us to be successful against multibillion-dollar corporations, while still providing the individual attention to each client.

The lawyers, paralegals, assistants and other staff at Nash & Franciskato all strive to build trusted relationships with every single client, from day one. Our clients are more than an inventory. Each client is given individual attention as we help guide them through the legal process, so they can focus on their recovery.
